E.C | <ul style="list-style-type: none">• Software Development and Networking
Amhara Science and Technology Comission
I am working on a software development sector in which I successfully accomplished my assigned tasks to develop a web based app. During which I am gained a solid foundation in Software engineering principles, website, system and mobile app development and deploying. |
|--|---|

OBJECTIVE

As a recent graduate, I am seeking challenging opportunities where I can fully use my skills for the success of the organization.

PROJECTS

- **Task and Project management system**

A web based system designed for managing and controlling tasks and projects completion time and budget. It is used to monitor and track progress, set priority. It is developed using the MERN stack.

- **Market price prediction**

The project is aiming at predicting the price of the market. Whether it is a coffee price or tea, or any other market value. Developed using python (Anaconda, jupyter notebook)

- **Online Library management system**

A system used for librarian and members of the library. Used to borrow and read books. the system includes almost all the functionality that the library give.

- **Shortest path**

It is an idea of the Dijkstra algorithm that used to find the shortest path or route from one city (starting node) to another city (destination node) in which we save our time energy and cost. It is written in python.

ACHIEVEMENTS & AWARDS

- Debre Markos University President Ambassador list (an award given for student scoring above 3.75)
- Learning Academic achievement (from grade 5 - 12) by ranking #1

COMMUNICATION AND INTERPERSONAL SKILL

- Good leadership skill.
- Flexible and Harmonious relationship with team mate.
- Positive thinker, Decision making and Problem solving.

LANGUAGES

- English (Proficient in all Skills)
- Amharic (Native speaker)
